RE: June 2011 Price Increase

Dear Valued Customer:

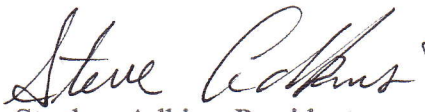

Throughout 2010 and continuing into 2011 and the foreseeable future, market conditions continue to pressure our industry. From escalating input costs, to freight and inflationary forces, we have all experienced dramatic increase in the costs of business. Forecasts for cost balances have been markedly exceeded. We see no short term change in these trends.

It is necessary that Stabilit America implement a minimum 6 % increase on all products.

Stabilit America will continue to utilize improvements in operational processes to bring you the best value for your business and your customers.

Thank you for your continued support and your business. Your Regional Sales Manager can help you with more information regarding this issue.

Sincerely,

Stephen Adkins, President
Stabilit America, Inc.
